

XXXIX.—*Additions to Mr. Wood's Catalogue of Crag Radiaria*\*. By M. AGASSIZ.

*To the Editors of the Annals and Magazine of Natural History.*

GENTLEMEN,

MONS. AGASSIZ a few hours previous to his departure for the continent paid me a very short visit, and was able to determine among my crag *Radiaria* the following genera, which I am desirous should be made known (having his permission), as there are some among them that would scarcely be looked for in that deposit. The list comprises all that M. Agassiz had seen from the crag during his sojourn in this country.

Yours, &c.

S. V. WOOD.

December 8, 1840.

No. of Sp.	DESCRIPTION.	Coralline Crag.	Red Crag.
	GENERA.		
1.	Pentacrinus.....	.....	Sutton.
1.	Comatula.....	Sutton.	
2.	Comatula.....	Sutton.	
1.	Asterias .....	Sutton.	
1.	Echinus .....	Iken.	
1.	Echinopsis .....	Sutton.	
2.	Echinopsis .....	Ramsholt.	
3.	Echinopsis .....	.....	Sutton.
1.	Temnopleurus .....	Ramsholt.	
2.	Temnopleurus .....	Ramsholt.	
3.	Temnopleurus .....	.....	Sutton.
1.	Arbacea .....	Ramsholt.	
1.	Salenia .....	Sutton.	
1.	Fibularia .....	Ramsholt.	
2.	Fibularia .....	Sutton.
